### 7 Nozzles

Automatic, Ball, Diesel, Manual, Regular & Fuel Meters

### 8 Filtration

Adaptors, Baskets, Biofilters, Particulate Filters & Strainers

### 10 Truck Tank Equipment

Accessories, Adaptors, Air Interlock Valves, Bottom Loading Adaptors, Camlocks, Couplers, Drop Elbows, Dry Breaks, Dome Lids & Vents, Emergency Valves, Faucets, Gravity Drop Adaptors, Manifolds, Overfill Protection, Valve Operators, Vapor Check Valves & Wet-R-Dri Valves

### 24 Swivels & Breakaways

Nozzle Checks, Spouts & Swivels

### 25 Hose & Hose Reels

Curb Pump Hose, Fuel Oil Delivery Hose, Hose Fittings, Rewind Reels, Static Grounding Reels & Swivel Joints

### 37 Pumps

Air Diaphragm, Air Driven, Bulk Transfer, Custom Fueling Skids, Drive Shafts, Drum Coolers, Fuel Transfer, Hand, Hydraulic, Industrial, PTO's, PTO Driven & Transfer

### 49 Meters & Registers

Electronic, Eliminators, Flow Meters, Mechanical, Preset Counters, Printers, Registers & Valves

### 67 Valves & Switches

Angle, Ball, Butterfly, Check, Gate, Pressure, Shuttle, Solenoid, & Wet-R-Dri Valves

### 68 Storage Tanks

Air Interlock Valves, Bottom Loading Adaptors, Couplers, Dry Breaks, Dome Lids & Vents, Emergency Valves, Faucets, Fittings, Gravity Drop Adaptors, Overfill Protection, Valve Operators, Vapor Check Valves & Wireless Gauges

### 71 Service Station Equipment

Adaptors, Breakaways, Caps, Fittings, Gauge Sticks, Hose, Manholes, Rulers, Storage Tank Fittings & Tightfill

### 72 Safety Items

Decals, Fire Extinguishers, Lights, Placards & Reflectors

### 75 Spill Containment

Oil Absorbent, Sorbent, Response Packs & Spill Kits

### 79 New! & Other Items

Amp Breakers, Cabinets, Clamps, DEF Equipment, Gaskets, Gloves, Loading Arms, Miscellaneous, Order Form & Info, Solenoid, Switches & Swivel Joints

## Dome Lids

**NEW AND IMPROVED!**

# **T196SV** Vapor Recovery Vent  
# **T196SVRK** Vent Repair Kit

# **1986SV** Obsolete, Air Operated Vapor Valve  
# **1986SVRK** Vent Repair Kit

Civacon's **T196SV** sequential vapor recovery vent design increases flow while loading and unloading, and is designed to work on a 16" Manhole cover. Civacon's **T196SV** is a direct replacement for the **1986SV** and all competitors' vapor recovery vents.

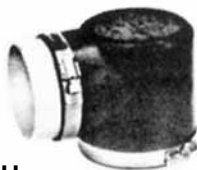

- Improved seals are compatible with ethanol, methanol, diesel, biodiesel and gasoline
- Rotatable mounting design
- An added exhaust port for quicker opening and closing of the vent's poppet
- Improved cap design for a better seal and the elimination of the old snap-ring system

**Betts**

## Emergency Valves & Operators

### Betts New Style Operator

Available from 1 to 5 compartments, with or without air assistance.

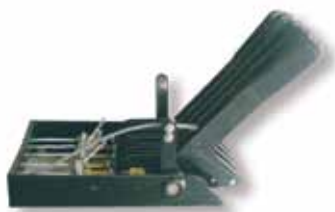

*Call Oilmen's for pricing.*

### Betts Old Style Operator

Non-Lubricated or Lubricated, 1 to 5 compartment operator, with or without air assistance.

*Call Oilmen's for pricing.*

### Morrison Brothers Operator

Lubricated, 1 to 7 compartment operator, with or without air assistance.

*Call Oilmen's for pricing.*

“ Been doing business with Oilmen's for over 35 years and we get excellent service. Everyone on the phone is wonderful - and always helpful beyond words. Just terrific. Great Folks! ”

— Kay B., Charleston, SC

### Morrison Bros. Co.

Cable operated belly valve. Available in 2" and 3" sizes. Available flanged or grooved. Shear groove meets TTMA RP84-04. Handle is equipped with a 250° fuse plate allowing valve to close in the event of fire.

#603ALV-0900AV

### Civacon

Internal air emergency valve. Internal air allows minimal space during installation on Bobtails. Shear groove meets TTMA and DOT 406 requirements. Comes with manual opening device for emergency discharge of cargo. Available flanged or grooved.

#VA1050

### Betts

Flat seat style cable operated belly valves combine Betts quality with an economical design. Valves feature aluminum construction with a specially designed seat disc to provide positive sealing. Shear section tested per TTMA and meets 49CFR178 345-8. Available flanged or grooved. Also available with air operation.

#A41031F

## Manifolds

**Civaflo™**

### Dual Manifold & Fuel Control System

*Call Oilmen's for pricing.*

#### Enhance Your Fuel Transfer Productivity, Profitability, and Peace-of-Mind.

The New CIVAFLO™ Dual Manifold & Fuel Control System by CIVAICON helps improve the quality and performance of your delivery service.

Eliminate the number of adapters, couplers, and jumper hoses needed to unload fuel:

- Improves Driver Productivity
- Improves Driver Safety
- Eliminates Mess and Hassles
- Reduces Potential Environmental Hazards and Clean-Up Costs

Increase your control. Ensure that pipe connections are correctly matched with fuel compartments before any fuel can be unloaded:

- Ensures Quality Control On All Deliveries
- Reduces Potential Product Cross Contamination
- Improves Your Peace-of-Mind
- Enhances Security

**civacon**

**EMCO WHEATON™**

### Air Operated Double Manifold Assembly

*Call Oilmen's for pricing.*

#### Designed for Bobtail Tank Trucks where a Double Pump System is required.

The **twin chamber assembly** allows the vehicle to pump off multiple products without product contamination. This gives the operator a safe, clean and simple way of loading and unloading the vehicle. Combining the manifold with our air control system will ensure no product crossover contamination.

- **Lightweight**, robust extruded aluminum tube
- **Multiple compartment** variants available
- **Bottom loading** performed straight through manifold valve
- **Fully functioning at -40° F**
- **Product return system** available for product flushing directly back into compartment
- **Double acting internal air cylinder** in manifold valve combined with poppet spring ensures positive opening and closing of cylinder to eliminate contamination
- **Guardbar assembly** and guard bar brake interlock ensures safety and security (optional)
- **Variable API valve centers** offer full flexibility of mounting whilst maximizing use of space available. Two standard sizes available: 12" & 14"
- **3" Bottom mounted pump outlet** for full drainage of manifold section (TTMA flanged or 3" grooved Victaulic available)
- **Self-centralizing & cleaning manifold valve poppet** for improved sealing and extended life
- **Corrosion resistant components**
- **Truck cannot move** with manifold valves open when combined with our double manifold air control panel
- **Maximum product working pressure 75 psi**

### BC Marina Petroleum Dispensing

For dispensing gasoline to pleasure craft & commercial boats at fresh and salt water marinas. UL 330 and ULC approved. **We can cut to the length you need, up to 400' length.**

Size	Price/Ft.
2"	\$12.10
3"	17.20
4"	23.40

### Corrugated Petroleum Transfer

For the transfer of gasoline and other petroleum base products under pressure, gravity flow or full suction where maximum flexibility is needed. **We can cut to the length you need, up to 100' length.**

Size	Price/Ft.
1-1/4"	\$ 6.60
1-3/8"	7.15
1-1/2"	7.95

Size	Pre-cut 100'	Pre-cut 125'	Pre-cut 150'

1-1/2"	795.00	993.75	1192.50

### Redwing® Fuel Oil Delivery

For the transfer and delivery of fuel oil and petroleum products for home delivery, commercial, and industrial service. Redwing Fuel Oil has two textile braids. The braided construction reduces kinking and twisting when reeling. The smooth cover has low drag resistance.

Redwing hose is available in these pre-cut lengths: 100', 125', 150', but we can also cut to the length you need, up to 150' length.

### Vapor Hose

For the recovery of gasoline vapors in tank truck loading at bulk terminals and in tank truck unloading at service stations. **We can cut to the length you need, up to 100' length.**

Size	Price/Ft.
1-1/2"	\$ 8.15
2"	8.80
3"	13.40

### Flexwing Versafuel™ Petroleum Transfer

Versatile fuel transfer hose for tank truck and in-plant operations to transfer diesel, biodiesel blends, ethanol blends, gasoline, oil and petroleum-based products up to 60% aromatic content. **We can cut to the length you need, up to 100' length.**

Size	Price/Ft.
2"	\$15.15
3"	16.85
4"	23.15

### Flex Drop

Designed as a lightweight and flexible hose to transfer gasoline and other petroleum products under pressure, gravity flow or medium suction (up to 23" Hg) at ambient temperatures. Maximum aromatic content 70%. Outer PVC helix provides abrasion resistance and low coefficient of friction. **We can cut to the length you need, up to 100' length.**

### Gasoline Dispenser Hose

A premium hardwall curb pump hose. Minimizes weather checking. Provides kink resistance and low computer creep. UL 330 and CUL approved. UL approved for E85 and Biodiesel applications.

Pre-cut Lengths Available:

### OILMEN'S TIPS

Not sure which fittings to use with which hose? Call Oilmen's.

We prefer you call us to discuss your hose needs before you order. Having years of experience in this business, we can determine exactly what you'll need and ship out the correct items the first time.

“ I am pleased with the relationship our company has enjoyed with Oilmen's for over 25 years. The quality of their product and the expertise of their personnel is a testimony to their commitment to our industry. Oilmen's has consistently given us a quality product which greatly contributed to our success. ” — Mike L., Jacksonville, FL

**Prior to ordering parts:**

- 1) **CHECK DIMENSIONS**
- 2) **CHECK WEIGHTS**

To receive a detailed parts breakdown drawing for Series IV, request ISO 103.

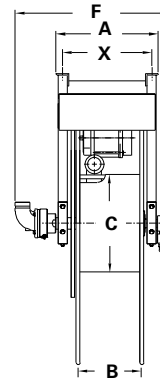

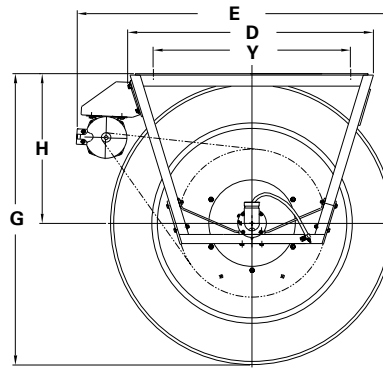

**When ordering a reel for Inverted Installation:**

Specify which component locations you prefer using the "Guide for Series IV Inverted Installations" shown at bottom of page.

Specify which location you prefer by letter: "A", "B", or "C".

If not otherwise specified, reels will be shipped as shown in diagram "Installation A" below.

To Order, specify ALL items:

- 1) Gauge, Length, O.D., and Coating if required
- 2) Finish, if it is anything other than standard
- 3) Complete model number

To receive a detailed parts breakdown drawing for Static Grounding Reels, request ISO 10.

## Series HGR

Models **HGR50** and **HGR100** are available with 1/8", 7x19 galvanized carbon steel cable with 100 amp Alligator Clamp as standard. Stainless steel or plastic-covered cable & "Y" branches are available at an additional charge.

A non-sparking ratchet assembly locks the reel when the desired length of cable has been payed out. These heavy-duty reels are repairable and parts are readily available, hold large capacities of cable and are ideal for industrial and mobile hard duty applications. Standard finish is oven-cured enamel. Also available, manual rewind version.

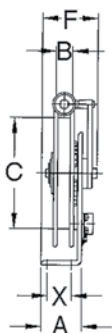

**Model HGR50**

## Series GR75

Model GR75 is available with 1/8", 7x19 galvanized carbon steel cable with 100 amp Alligator Clamp as standard. Stainless steel or plastic-covered cable and "Y" branches are available at an additional charge.

This reel has a permanently sealed spring and is a good economical choice for compact and lightweight uses.

Standard finish is oven-cured enamel. Also available, manual rewind version.

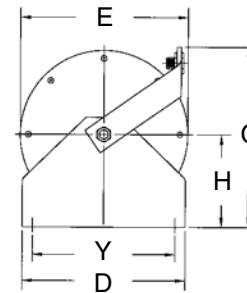

Call Oilmen's for pricing.

# Hose Reels

## GM-700 GuideMaster

### OILMEN'S TIPS

Periodically check for sharp edges on your roller bearings.

Worn out roller bearings can shorten the life of your hose.

### 3600 Series Nomenclature

#### Port Orientations

First digit identifies **Port Orientation**:

- 3 specifies ports located at 90°, i.e. top and side locations
- 4 specifies ports located at 180°, i.e. side and side locations

#### Sealing Arrangements

Second digit identifies the **Sealing Arrangement**:

- 6 specifies packing
- 7 specifies mechanical seal

#### Sizes Available

- 11 provides .11GPR
- 17 provides .17GPR
- 22 provides .23/.22GPR
- 35 provides .37GPR
- 38 provides .38GPR
- 48 provides .52GPR
- 58 provides .58/.60GPR

#### Drive Arrangements

- H specifies Pump Head without outboard bearing
- HB specifies Pump Head with outboard bearing
- GHB specifies Pump Head with outboard bearing and built-on gear reduction unit
- F specifies Pump with flanged ports

### 4668-4699 Series Nomenclature

The nomenclature for this series is the same as the 3600 Series. Two sizes are available:

- 68 provides .68GPR
- 99 provides .99GPR

### Nomenclature Example

#### Model 3611HBF

First digit **3** = 90° ports

Second digit **6** = packing seal

Third digit **11** = .11 gallons per revolution (GPR)

**HB** letters = pump head with outboard bearing

**F** letter = flanged ports

#### OILMEN'S TIPS

✓ For help placing orders or getting answers to questions: **Call Oilmen's with Serial and Model Numbers, if possible.**

✓ To adjust bypass: **Turn in or out a 1/4 turn, whichever way is needed.**

✓ To turn pressure up: **Turn clockwise.**

✓ To turn pressure down: **Turn counter clockwise.**

✓ If there is a problem with cavitation noise: **Check strainers, pump gears and pump body for wear.**

✓ If pump is not creating enough suction: **Check strainers, pump gears and pump body for wear.**

## PTO's & Drive Shafts

**Hydraulic Motors**

### OILMEN'S TIPS

When ordering these items, we'll need to know...

What is your truck model, the type of transmission, on which side will it be mounted, and will it be hot shift?

OR

What is the model number and the serial number of the parts you are replacing.

**Vickers Hydraulic Pumps**

**Chelsea PTO's**

**Muncie PTO's**

**Drum Coolers**

**PTO Control**  
# DAV120 ..... **CALL**

**PTO Control w/Brake Lock**  
# DAV1208..... **\$90**

**Heavy-Duty PTO Shafts**

Custom made. Just give us a call with the length you need.

*“ This is my 57th year in business.  
Been buying from Oilmen's since 1962.  
They're service oriented, like we are. ”*

— Hayden B., Homestead, FL

### OILMEN'S TIPS

To determine the correct length for replacing shafts:

— BEFORE YOU ORDER —

Measure the distance from the tip of the PTO shaft to the tip of the pump shaft.

## Air Diaphragm Pumps

These **Aro Diaphragm Pumps** have been designed specifically for dispensing petroleum-based fuel. These pumps meet UL-79 specification, code and are compatible with:

- **Gasoline** • **Aviation Fuel** • **Diesel Fuel**
- **Fuel Oil** • **Kerosene** • **Unleaded Fuel**

Used for high-volume transfer, bulk-unloading or fueling applications. To meet UL-79 specification, a pressure relief valve opens and bleeds off excess pressure. The relief valve can be plumbed to return the bled-off fuel to the storage container. *Call Oilmen's for pricing.*

ARO Ingersoll-Rand  
EXP Metallic & Non-Metallic Pumps

*Give us a call! We can help you determine the correct pump to use for your specific purposes.*

### How does ARO EXP reduce air consumption?

#### “Unbalanced” Major Air Valve

Unbalanced valve design eliminates valve centering and pump stall-out, even under low air inlet pressures.

#### “D” Valve

Helps insure optimum energy efficiency while avoiding costly air “blow-by.” Ceramic construction insures long service life.

#### “Simul-Shift™” Valve

Provides an ultra-positive, reliable shift signal that avoids stall-out. Faster trip-over improves delivery with less pulsation and superior laminar material flow.

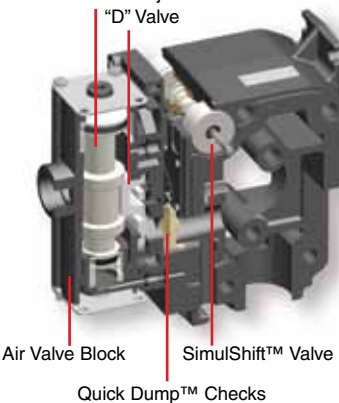

#### “Quick-Dump™” Checks

Eliminates pump ice-up by diverting cold, wet exhaust air away from the major air valve. Removes the need for space heaters, hot water taps or other ice-preventive contraptions.

#### Simplified Major Air Valve Block

New valve block design is easy to access, simple to service and requires no air line lubrication. Aluminum or Glass-Filled Polypropylene body allows you to maximize corrosion resistance.

#### “Unbalanced” Major Air Valve

Air Valve Block  
SimulShift™ Valve  
Quick Dump™ Checks

## Fuel Transfer Pumps

**TUTHILL**  
CORPORATION

#SD1202 2" Bung Mount  
12 Volt, 13 GPM. Rugged cast iron,  
designed for tank and barrel mounting.

**TUTHILL**  
CORPORATION

#FR701 2" Bung Mount  
115 Volt, 20 GPM,  
with Meter.

#FR700 2" Bung Mount  
115 Volt, 20 GPM,  
without Meter.

**TUTHILL**  
CORPORATION

### Piston Pump - 1 Quart per Stroke

Compact, dual-action, high flow design. Light-weight and portable, with a variety of options, these pumps meet a full range of applications. Ideal for gasoline, oil or a wide variety of approved liquids.

#FR152

**TUTHILL**  
CORPORATION

### Mechanical Flow Meter

For metering diesel fuel, gasoline, kerosene, mineral spirits, stoddard solvent and heptane. Operates at 5 to 20 GPM and is accurate to +/-1%.

Frame Mount

### 80 Series® Pumps

**80 Series®** pumps are designed for non-stop workloads. The straight-in-suction design of these high-efficiency pumps guarantees quick, positive self-priming and allows them to operate at higher suction levels than most other self-priming centrifugal pumps. Liquid enters directly into the impeller eye. A suction check valve presents in-line return flow when the pump is shut off. And, because 80 Series pumps have few moving parts, maintenance is minimal. 80 Series pumps are available with self-lubricated mechanical shaft seals.

#### Specifications

- Size:** 1-1/4" (31.25 mm)  
1-1/2" (37.5 mm)  
2" (50 mm), 3" (75 mm)  
4" (100 mm), 6" (150 mm)  
8" (200 mm), 10" (250 mm)
- Max Capacity:**  
2,800 GPM (177 lps)
- Max Head:** 205' (62 m)
- Max Solids:** 2.5" (64 mm)
- Max Temperature:** 160 F (71 C)
- Materials of Construction:**  
Cast Iron, Stainless Steel

*Call Oilmen's for pricing.*

### Roto Prime RD & RS Series®

**Roto Prime®** self-priming centrifugal pumps are specifically designed for pumping petroleum products, petrochemicals and solvents. They are available as straight centrifugal pumps or with the exclusive Roto Prime design®. This design incorporates a variable capacity vane pump that quickly and automatically evacuates air and vapor, making them ideal for off loading transports and stripping hoses.

#### Specifications

- Size:** 2" (50 mm), 3" (75 mm)  
4" (100 mm), 5" (125 mm)
- Max Capacity:** 1,460 GPM (92 lps)
- Max Head:** 390' (119 m)
- Max Solids:** 0.5" (13 mm)
- Max Temperature:** 160 F (71 C)
- Materials of Construction:**  
Cast Steel, Ductile Iron

*Call Oilmen's for pricing.*

### O Series®

**O Series®** have a straight-in suction design (there is no check valve) which eliminates entrance restrictions and provides better suction performance when handling solvents and similar liquids.

**O Series®** pumps can be used as transfer pumps, clean water supply pumps, on spray applications and many other industrial uses. They provide reliable performance with few moving parts and offer savings in maintenance and efficiency.

**O Series®** pumps are available pedestal mounted for flex coupling or v-belt coupling to a power source or close coupled to electric motors. Power take-off models are also available with helical gear increasers for heads up to 400 feet (121 meters).

#### Specifications

- Size:** 2" (50 mm), 3" (75 mm)  
4" (100 mm), 6" (150 mm)
- Max Capacity:** 1,350 GPM (85 lps)
- Max Head:** 400' (122 m)
- Max Solids:** 1.19" (30 mm)
- Max Temperature:** 160 F (71 C)
- Materials of Construction:** Aluminum, Bronze, Cast Iron, Ductile Iron

## M-5 1-1/2" Meter

### OILMEN'S TIPS

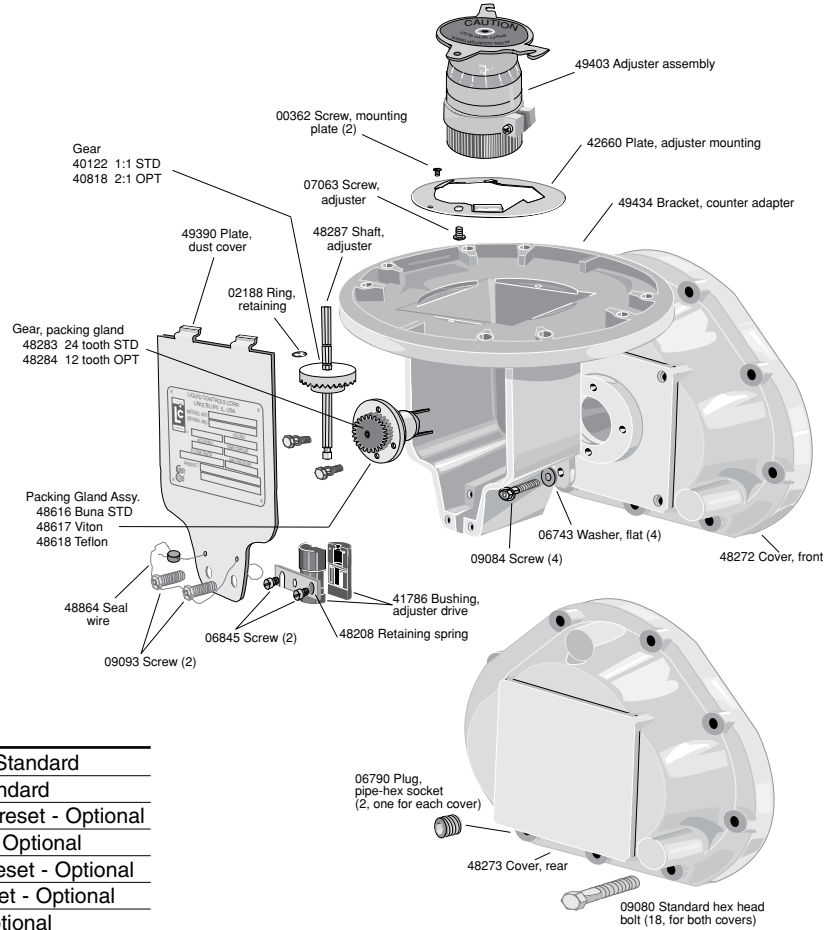

When ordering, be sure to:

- 1) Specify meter model #
- 2) Specify serial # of meter
- 3) Use Part Number (Not Item #)

Reminder:

Check your meter against loading rack occasionally to verify calibration.

Call 1-800-859-8265 for parts or service.

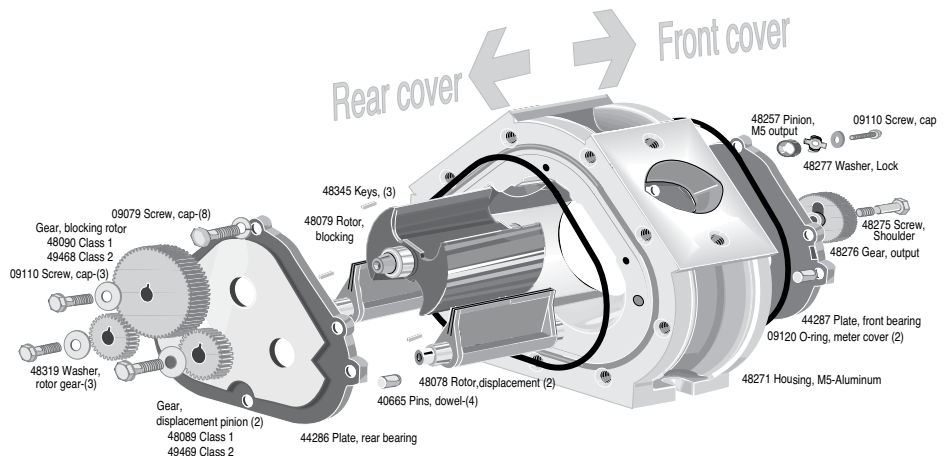

### M-5 1-1/2" Meter Gear Plate

Part #	Qty	Description

“If you need parts, Oilmen's always has them. I can't remember a time when I called Oilmen's for parts when they weren't available.”

— Bert B., Orlando, FL

## Optical Air Eliminators

The Liquid Controls Optical Air Eliminator is designed for use with LectroCount® Electronic Registers. It provides for the efficient elimination of air and vapor with virtually no moving parts and without the need for floats, guide rods, reed strips, and valve plates. An optical sensor, installed in the wall of the air eliminator, is used to monitor the liquid level. The presence or absence of liquid at the sensor level activates or deactivates a solenoid located at the top of the air eliminator. The Optical Air Eliminator requires the use of a solenoid operated valve such as the E-7 or A2848-11 supplied by Liquid Controls.

The solenoid operated, air-release valve, located at the top of the air eliminator, is either open or closed. When the liquid level is below the optical sensor, the solenoid opens and vents air and vapor to atmospheric pressure. Simultaneously, the electronic control valve (E-7 or A2848-11) at the meter outlet closes.

When liquid rises to the optical sensor level, the solenoid closes and prevents continued venting to atmospheric pressure, and the electronic control valve at the meter outlet opens so that a delivery may continue. This functionality ensures that only liquid passes through the meter for measurement and facilitates passing Weights & Measures split compartment testing.

The optical air eliminator is designed to work with Liquid Controls M5, M7, M10, M15, and M25 meters, for applications measuring refined petroleum products. Designed with the same mounting dimensions as Liquid Controls mechanical air eliminators, the optical air eliminator does not require plumbing changes to retrofit to existing meter installations with electronic registration. Electronic registers require CPU board part number 81920 for the LectroCount LCR and LCR-II and part number 81924 for LC<sup>3</sup>.

*“ I recently ordered a small electrical part from Oilmen's Truck Tanks. It has arrived and all is well. I have been trying to order the same part from the truck's manufacturer for three months. Oilmen's part arrived in THREE DAYS. Enough said! ” — Steve S., Clarksville, TN*

## Flow Meters & Electronic Registers

### Compact Meters Type 4

#### Three models are available.

The 1-1/4" and the 1-1/2" Red Seal Compact Meters are especially suited to small and medium capacity tank trucks. These meters are completely self-contained units with strainer, air release valve, and back-pressure valve, and require no accessory equipment. Because of their compactness, they save valuable payload space and weight.

These meters can be assembled for either right-hand or left-hand flow, and can easily be changed from one to the other in the

field. This adaptability not only simplifies installation, it also eliminates the need for separate right-hand and left-hand casings when two meters are installed on a truck.

Like the 1-1/4" and 1-1/2" Compact Meters, the 2" Red Seal Compact includes a strainer, air release valve, and back pressure valve – all the accessories needed for perfect tank truck metering. This compact meter permits greater flexibility in installation and saves valuable payload weight and space.

This all-purpose compact meter can be assembled for either right-hand, left-hand or angle flow to fit practically any piping and space conditions. Ideal for dual-metered trucks.

**1-1/4" Compact Meter Type 4  
# 30 GPM ..... CALL**

**1-1/2" Compact Meter Type 4  
# 60 GPM ..... CALL**

**2" Compact Meter Type 4  
# 100 GPM ..... CALL**

**Oilmen's offers an Exchange Program for ALL Meter Registers we sell!**

*Questions? Call Oilmen's for experienced help.*

**Four register models are available.** Red Seal meters are furnished with a choice of four models of direct reading registers. Numerals are large, easy to read. Every register has a totalizer. Housings are corrosion-resistant, weatherproof.

**MODEL 832 Auto-Stop  
(and MODEL 842)  
\$ 1,253**

Register provides automatic deliveries. Operator sets the register for any desired quantity simply by pushing buttons. He can then devote his entire attention to the delivery, knowing that the flow will be cut off automatically at the exact gallonage desired.

**MODEL 833 Print-O-Meter  
(and MODEL 843)  
\$ 1,423**

Register prints a receipt or ticket which shows gallonage readings before and after delivery. Ticket is locked in the register during delivery to prevent fraud. It also prints letters to identify the meter or truck, and has serial wheels to number the ticket.

**MODEL 834  
Auto-Stop Print-O-Meter  
(and MODEL 844)  
\$ 1,927**

Combines all the features of the other registers – Auto-Stop quantity controls plus the printed tickets that are preferred by customers. Already popular as a time-saver for tank trucks, it is fast gaining acceptance for bulk plant service.

**MODEL 831  
(and Model 841)  
\$ 819**

The basic direct-reading reset counter.

**When ordering replacement parts:  
Please specify the model & code #'s.**

### OILMEN'S TIPS

Are you emptying your overflow or "spit tank" every day?

If your overflow or "spit tank" is filling up daily, your air eliminator has a mechanical problem. Call on Oilmen's. We have the experience and know how to help determine your problem, and can quickly send the parts you'll need to fix it.

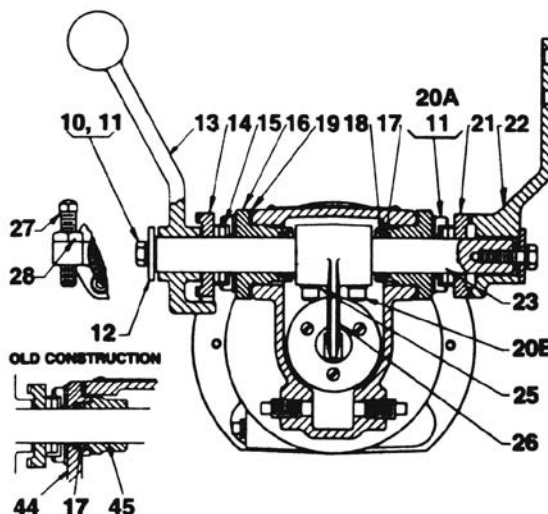

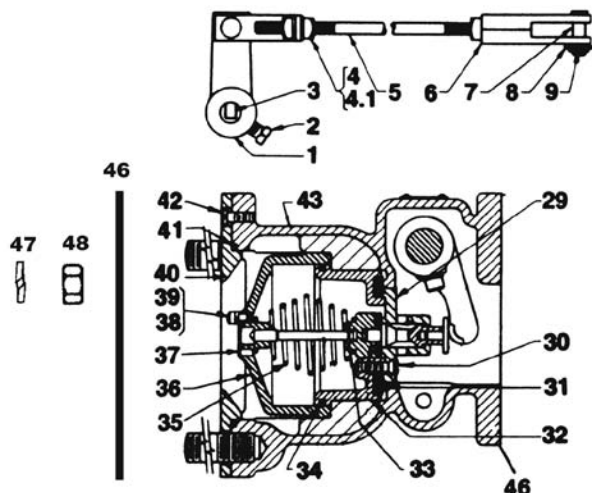

When ordering replacement parts:  
Please specify the model number.

Place your order by 3:00 p.m. –  
We'll ship it the same day.

## Double Trip Set Stop Valves

## Meter Calibration

### Neptune Change Gear Chart for Meter Calibration

S Gear	R Gear	RATIO	S Gear	R Gear	RATIO
19	18	105.56	20	18	111.11
20	19	105.26	21	19	110.53
21	20	105.00	22	20	110.00
22	21	104.76	23	21	109.52
23	22	104.55	24	22	109.09
24	23	104.35	25	23	108.70
25	24	104.17	26	24	108.33
26	25	104.00	27	25	108.00
27	26	103.85	28	26	107.69
28	27	103.70	29	27	107.41
29	28	103.57	30	28	107.14
30	29	103.45	31	29	106.90
31	30	103.33	32	30	106.67
32	31	103.23	33	31	106.45
33	32	103.13	34	32	106.25
34	33	103.03	35	33	106.06
35	34	102.94	36	34	105.88
36	35	102.86			

**NOTE:**

If register reads over, subtract adjustment.

If register reads under, add adjustment.

**EXAMPLE:**

Register reads 200.00  
 Actual amount -199.60  
 .40 ÷ 2 = .20 on 100/GAL

If these Gears 35S & 33R are in the register:

RATIO 106.06  
 - .20  
 105.86 = New Gears 36S & 34R

## Do you have a copy of Oilmen's Fact Finder?

Handy information, complete with charts. Fits right in your shirt pocket. Drivers love 'em! To request a booklet, call (864)573-7400 or (800)859-8265 – or you can send your name and shipping address via email directly to our parts counter at:

[parts@oilmens.com](mailto:parts@oilmens.com)

“We've been in business since 1969. My Dad started buying trucks from Oilmen's Truck Tanks in the mid 80's – we're now the second generation doing business with them. Our success is predicated on Oilmen's building our trucks to meet our needs in a timely fashion, which allows us to live up to our slogan 'Fueling Your Success.' ” — Craig L., Kissimmee, FL

## MID:COM

## Electronic Registration

### Model 6501B Features

- Time and date stamp
- Pricing from \$0.000 to \$9.999
- Taxation from 0.00 to 9.99% or \$1 unit (other options available)
- Displays 9999.9 units maximum
- Printer adjustable for ticket width, depth and line spacing
- Computer calibrates meter in single meter installations (dual equipped truck requires calibrators in the registers if used on Neptune meters)

### Model 8000 Features

- Upload and download of customer information from office computer
- 4 Line LCD display
- Adjustable printer prints up to 6 copies
- Available to print and display in different languages
- Programmable for different currencies
- Integral preset capability
- Integral dual register capability

At today's prices you need to account for every drop you deliver. The MID:COM system allows your driver to meter every transaction — print and invoice in one easy step. Oilmen's Truck Tanks offers two Mid:Com Computer Register Systems:

**The MID:COM 8000** adapts to any meter and any product from petroleum to liquid fertilizer. Accuracy is assured with readings of 1/100 of a unit, standard or metric measure.

The Ram Card - Mid:Com's Random Access Memory (RAM CARD) offers the ability to upload information from the office computer to the Mid:Com, then back to the office computer for automatic posting of accounts and data information.

The Data Card - This "little black box" programs the data-cards to give the delivery person up-to-the minute information for his day's deliveries. It is capable of quickly loading a multitude of information about each customer.

**The MID:COM 6501B** allows you to set the price, tax rate, and print a ticket when the delivery is complete. The register mounts directly on the meter and provides a clear digital readout.

*Oilmen's has experienced, trained technicians to install and repair the Mid:Com electronic registering systems.*

## Printers, Registers & Preset Counters

**VEEDER-ROOT**  
Register  
& Ticket Printer  
#7890

Price Each	3+ Each
<b>\$1,234</b>	<b>\$1,150</b>

The **7890 Register & Ticket Printer** combine to produce clean and detailed printed records of high speed fluid deliveries and transactions. Ideal for increased efficiency in all kind of liquid inventory monitoring and control situations.

The printer accepts standard 4-7/8" by 7-3/4" carbon packs and receipt tickets. Ticket is tamper proof – staked inside the printer until data has been completely printed.

### Replacement Printers Available

### OILMEN'S TIPS

**If you are ordering replacement parts:**

Call Oilmen's with the model and code numbers. The code number can be found on the front plate of register, in the space following the dash symbol.

**All remanufactured items have a 1-year warranty: 1 year or 1 million gallons, whichever comes first.**

### Nozzle, meter, mechanical computer, pumping and register cores are:

- Inspected for defects to insure the unit is rebuildable.
- Completely disassembled and cleaned.
- Individual parts inspected for wear and damage.
- All O-rings, gaskets, and seals are replaced.
- Valve seat surfaces ground and precision lapped.

### 100% of remanufactured units are thoroughly tested.

- Meters are tested with several hundred gallons before calibration.
- Meters calibrated to 1 cubic inch on fast and slow flow.
- Meters pressurized to ensure no leaks.
- 1A, 11A, & 7H nozzles are ETL listed. All nozzles are tested to UL Standard 842, the same standard used for new nozzles.
- Computers tested for 500 gallons to assure accurate readings.
- Registers for a minimum of 1000 gallons.
- All remanufactured components have a one-year warranty.

## ***Fast and Dependable Service is OUR PRIORITY at OILMEN'S!***

All of us here at **Oilmen's Truck Tanks** are extremely proud of the superior level of customer service our parts department provides.

We put our heads together and decided to use an icon, the Oilmen's Parts Hero, which represents our well over 100 years of combined experience in the petroleum equipment business. Whether it's a replacement gasket you need or troubleshooting a problem with your pump or meter, we're here to help you. Look for our icon throughout this catalog for time saving advice and great tips on maintaining your equipment.

***We look forward to serving you. Give us a call today!***

Did you know that Oilmen's Truck Tanks has developed a full line of DEF Equipment to meet our nation's DEF delivery needs?

Talk to the experts at our Parts Counter to see how Oilmen's can help you meet your specific DEF Equipment needs.

Give us a call and we'll build a DEF Delivery System to fit your requirements.

**7-1/2 Gallon AST Spill Container**

**Overfill Prevention Valve 9095A**

**15 Gallon AST Remote Spill Container 515 Series**  
*Adjustable Single Column Base*

### Clock Gauge 818 Series

For measuring liquid level in above ground storage tanks. Gauge mounts on top of tank and is activated by a float connected to a cable. Readout is on a 12 hour clock face.

### Clock Gauge 918 Series

Utilizes the clock style clock gauge of the 818 with a built in high level warning alarm. Contains a battery powered intrinsically safe, alarm unit that is mounted remote from the gauge. Alarm is set for the desired level during installation and can be reset at any time.

### Pressure Vacuum Vent Model 748

The Model 748 is for normal venting of above ground storage tanks. This allows the tank to breathe during filling and discharging operations. Note: Pressure should be set to be less than the emergency vent setting. Models are available in brass or stainless steel poppets.

### Gate Valve 234 Series

Rising stem gate valves are available in ductile iron or brass. Teflon fitted is standard for ductile iron and optional for brass. Sizes available: 1-1/2", 2", 3" in NPT and flanged.

### Anti Siphon Valve Model 910ER

Used on aboveground tanks to prevent a release of the product should a rupture in the line occur below the liquid level in the tank. The valve is normally closed and will resist the head pressure and assist in preventing siphoning of the tanks' contents. Settings are 25 psi or 50 psi. Available in 1-1/2" or 2" ductile iron, brass seat and viton disc.

### Emergency Vent Model 244

The Model 244 series emergency vent consists of a body and cover that moves up and down on a center pin. Pressure inside the tank forces the cover to lift up off the vent seat allowing air to exhaust. The Model 244 is available in sizes ranging from 4" to 10", in MNPT, FNPT or flanged connections. This vent is for emergency pressure relief only and should be used in conjunction with a normal vent.

### Solenoid Valves Models 710 & 711

Used to prevent the accidental siphoning of product from the tank due to a fracture or leak in the piping below the liquid level of the tank. The model 710 is normally closed and the 711 is normally open. The 710 is available in brass/viton in 3/4" to 3" NPT, and S/S/TFE in 1-1/2" to 3" NPT. The 711 is available in brass/viton in 3/4" to 2" NPT sizes.

### Emergency Valve (Fire Valve) Model 346

Model 346 series emergency valves are available in sizes of 1-1/2" to 4" in ductile iron or stainless steel, with threaded or flanged connections.

### 3-1/2 & 7-1/2 Gallon AST Spill Container 517 & 518 Series

Installed on aboveground storage tanks for the purpose of containing small spills and drips during filling. Lockable, white powder coat, steel construction, ULC listed. 518 Series includes drain valve and vented lid.

### AST Overfill Prevention Valve 9095A

Installed in the fill port of an aboveground storage tank. The valve terminates flow when the liquid level reaches a preset warning level of 90-95% full.

### 15 Gallon AST Remote Spill Container 515 Series

For use on aboveground storage tanks to contain fuel spillage during the filling operation. Lockable lid, powder coated white, steel construction. 1" NPT drain with locking ball valve included. Choice of 2", 3", 4" fill ports, 2 maximum, sizes can be combined.

*Call Oilmen's for pricing.*

## Wireless Tank Gauges

### Wireless Store & Forward Controller *Call Oilmen's for model selection help and pricing.*

The Store & Forward Controller captures all data reported by a Centeron Monitor and uploads the information via standard telephone service to the Centeron Data Center for easy Internet access. It also contacts the Data Center immediately whenever a monitor transmission is manually initiated so you get the very latest level information when you need it.

- Reports all monitor readings
- Stores up to 100 monitor data points
- Automatically uploads monitor data to the Centeron Data Center when its buffer is full
- Immediately reports to the Data Center whenever a monitor transmission is manually initiated
- Models for 4 or 20 monitors

## Centeron®

### Wireless Pressure Monitor *Call Oilmen's for model selection help and pricing.*

Centeron Pressure Monitors accurately measure tank product levels in vented vessels, and send data to a Centeron controller using robust Direct Sequence Spread Spectrum (DSSS) wireless technology. The Pressure Monitor is a simple, cost-effective solution for remote level measurement in medium to large storage tanks up to 40 ft. or more in height.

- Suitable for a wide variety of fluids including hydrocarbons, chemicals and water/wastewater
- Installs easily in minutes
- No calibration required
- Low maintenance
- Wireless communication and battery power eliminate costly electrical wiring required by traditional tank measurement systems
- Submersible and external tank mounted sensors

### Wireless Radar Monitor *Call Oilmen's for model selection help and pricing.*

Centeron monitors are your eyes in the field. They measure tank fluid level and transmit that information to a Centeron controller via a robust wireless data link. The Centeron Radar Monitor has excellent accuracy and repeatability. It is used in a wide variety of fluid products and is especially suited for petroleum.

- Completely wireless
- Outstanding accuracy and repeatability
- Used in gasoline, diesel fuel, motor oil, lubricating oil, and water
- Easy, flexible installation
- No calibration required
- Low maintenance
- Eliminates costly electrical wiring

### Wireless Float Monitor *Call Oilmen's for model selection help and pricing.*

Centeron monitors accurately measure tank fluid level and transmit information to Centeron controllers via robust wireless data links. Centeron Float Monitors provide a cost effective means to remotely monitor small to medium sized tanks that contain a variety of fluids.

- Completely wireless
- Good for general purpose applications
- Typical fluids monitored include fuels, motor oils, lubricants, and water
- Easy to install
- Visual level indication at tank
- No calibration required
- Low maintenance
- Eliminates costly electrical wiring

### OEC Petroleum Systems, Inc.

OEC Petroleum Systems, Inc. provides sales and service of fuel dispensing systems, and related equipment for:

- Convenience Stores
- Truck Stops
- Municipalities
- Utility Companies
- Commercial Industry
- Fleet Fueling Applications

OEC Petroleum Systems, Inc. can supply you with Wayne pumps and other brand name fuel dispensers to fit your particular needs for gasoline, diesel fuel, kerosene, and alternative fuels.

We also offer fuel dispensing related equipment such as:

- Ruby POS (Point of Sale)
- POS Terminals
- Storage Tanks
- Transfer Pumps
- Fuel Piping
- Canopies
- Car Wash
- Area Lighting
- Electronic Tank Monitors
- Retail Credit Card Readers
- Fleet Fueling Card/Key Systems

Call us at 1-800-632-8265 the next time you need fuel dispensing and related equipment. Visit our website: [www.gaspumps.com](http://www.gaspumps.com)

### Gauge Sticks

Wooden gauge sticks are calibrated in 1/4" increments.

Available by the bundle or individually.

# Spill Containment

## Sorbent & Oil Absorbent

### 3M Petroleum Sorbent Spill Response Pack

Designed to quickly absorb and contain small petroleum spills and leaks. Absorbs up to 4 gallons of petroleum based liquids. Compact size, convenient for trucks. Outside carrying case also functions as a warning sign. Case contains 3 mini-booms and 5 highly absorbent pads, poly bag for temporary storage of used sorbents and instructions.

# SRP-PETRO ..... \$77

### 3M Petroleum Sorbent Folded Spill Kit

Compact kit for easy storage. Ideal for rapid response.

- Contents:
- 2 rolls of Petroleum Sorbent Folded (P-FL550DD)
  - 30 Petroleum Sorbent Pads (HP-156)
  - 3 temporary disposal bags and ties
  - 1 white, 20-gallon drum with lid and plastic closure ring.

# P-SKFL31 ..... \$139

### Oil Absorbent

Soaks up oil, grease, water, coolant and much more!  
Net Wt. 40 lbs.

Call Oilmen's for pricing.

*Don't see what you need?  
Give us a call. We'll find it for you!*

### 3M Petroleum Sorbent Roll

High capacity. Designed to cover large areas, or can be cut to cover small areas. One bale absorbs up to 73 gallons of petroleum-based liquid. Can be wrung out and reused many times over to reduce waste and reclaim fluids.

# HP-100 ..... \$107 Size Roll: 38" x 144'

### 3M Petroleum Sorbent Double Boom

Double-cylinder 5" x 10' design maximizes absorption and makes it easier to turn over for full saturation.

# T-280 ..... \$193 Bag of 4

### 3M Petroleum Sorbent 100 Pads

Convenient 17" x 19" size pads allow user to quickly spread absorbent on spill.

# HP-156 ..... \$63

### 3M Oil & Petroleum Sorbent Folded

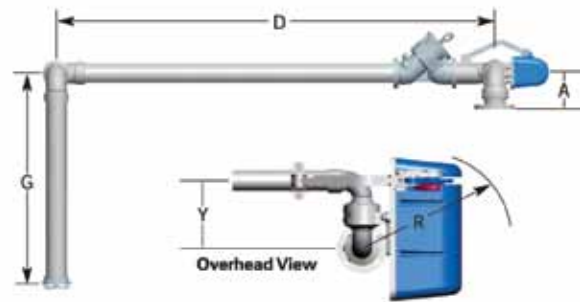

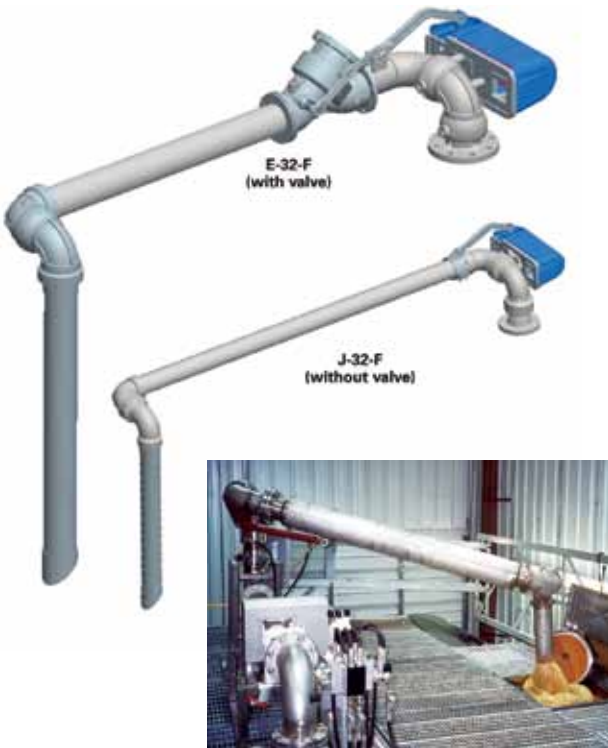

Folded sorbents are the easy-to-use solution for cleaning spills, drips and fluid leaks.

- Four sorbents in one. Can be used as a boom, pillow, pad, or roll, which means you stock fewer products to meet your sorbent needs.
- Perforations every 16 inches allow you to select the length you need, so there's less wasted sorbent.
- High water repellency saves money as oil, not water is recovered.
- Handy dispenser box for easy, on-site use.

# P-FL550DD ..... \$39 Size Roll: 5" x 50'

## Loading Arms and Swivel Joints

### Swivel Model Descriptions

# 3420F-040-3

Availability of styles, sizes and materials may vary depending upon swivel configuration.

*Call Oilmen's Customer Service regarding your exact requirements and pricing.*

### Construction

#### Conventional Hose Reel Swivels

- 26 = Aluminum Hose Reel
- 28 = Ductile Iron Hose Reel

#### Conventional Swivels

- 32 = Aluminum Hose Reel
- 33 = Ductile Iron Hose Reel
- 34 = Aluminum Hose Reel
- 36 = Ductile Iron Hose Reel
- 37 = Aluminum Hose Reel
- 38 = Ductile Iron Hose Reel
- 39 = Aluminum Hose Reel

#### Endura™ Split Flange Swivel

- 74 = Steel Endura™ LPG Hose Reel
- 79 = 316 SST Endura LPG Hose Reel
- 84 = Steel Endura DSF
- 89 = 316 SST Endura DSF

Note: Alloy20®, Hastelloy®, Monel®, Duplex, PTFE-lined and other materials available.

OPW swivels are used in bottom and top loading assemblies to fit truck, rail, and ship loading applications.

Any or all of these components can be custom engineered to meet your specific requirements.

**Style** (Planes of Rotation - shown above) Style 44 is drop tube swivel w/handle. Styles 35, 45, 55 have threaded boss. Styles 56, 58, 76, 78 have spring balance attachment lugs.

### End Connections

- F** = 150 lb. ASME flange both ends
- FFT** = 150 lb. ASME flange inlet x TTMA tank truck flange outlet
- FJ** = For submerged use, 150 lb. ASME flange both ends
- FO** = 150 lb. flange x female NPT threads
- FSB** = 150 lb. flange both ends, with spring balance attachment lugs
- FT** = TTMA tank truck flange both ends
- FTH** = 150 lb. ASME flange both ends
- VO** = 150 lb. ASME flange inlet x TTMA tank truck flange outlet
- FTO** = 150 lb. ASME flange both ends
- J** = 150 lb. ASME flange inlet x TTMA tank truck flange outlet
- LFT** = Long swivel joint with TTMA tank truck flanges
- TFT** = Female NPT threaded inlet x TTMA tank truck flange outlet
- VOG** = Female NPT threads x Victaulic® groove, hard coat anodized aluminum
- W** = Beveled for welding both ends

### Size

#### TERMS AND CONDITIONS

1. In order to establish a line of credit, we hereby authorize the companies and/or banks to release any credit information requested by Oilmen's Equipment Corporation and/or its subsidiaries, hereinafter referred to as Oilmen's.

2. It is agreed and understood by the undersigned, that if this Purchaser's Credit Application is approved by Oilmen's, the purchase will be subject to the terms and conditions contained herein and those contained on the invoice. Applicant further agrees to the following terms and conditions:

- (a) A service charge of 1 1/2% per month to be added to any account not paid in full by the invoice due date.
- (b) In the event of default, Applicant agrees to pay any and all costs of collection, including attorney's fees incurred whether or not collection of the account requires suit.
- (c) All merchandise sold to you pursuant to this agreement, shall be subject to a Security Agreement in favor of Oilmen's. The Security Agreement shall contain the standard provisions set forth in Article 9 of the UCC, as adopted in the State of South Carolina. In addition, the Security Agreement will provide that the title to the merchandise will remain with Oilmen's until paid for in full. Further, in the event that merchandise is not paid for upon the due date or other financing arrangements made, Oilmen's shall have the right, without notice, to immediately repossess the merchandise.

3. Merchandise may be returned only with the prior written approval of Oilmen's. Returned items must be referenced to purchase invoice number and sent freight prepaid to the location directed by Oilmen's. In addition, Oilmen's may collect a reasonable handling, restocking charge.

4. The undersigned certifies that all of the information on this form is correct and Oilmen's is relying on the information to establish a credit line. Further, that the undersigned fully understands the foregoing credit terms and agrees to the proper payment in consideration of extended credit.

## Sales, Shipping, and Pricing Policy

We accept VISA, MasterCard, and American Express credit cards, or will bill anyone with approved credit. All credit card orders over \$10,000 will incur a 2% processing fee.

Orders out of our delivery area in South Carolina will be shipped by motor freight or UPS. In-state orders over \$750 are prepaid. Freight on orders less than \$750 will be added to your invoice. All out of state (South Carolina) deliveries are FOB Spartanburg.

**All orders called in before 3:00 PM will be shipped the same day.**

Prices listed throughout catalog may change without written notice due to market fluctuations. Please call to verify pricing before placing your order.

U.P.S. Guaranteed Ground Days in Transit

## It's Easy to Order from Oilmen's Truck Tanks

### Three Ways to Place Your Order:

1) **Open Account**

2) **Credit Card** –    

*We accept Visa, Master Card and American Express*

3) **Check or Money Order**

### New Accounts

If you wish to establish an "Open Account," you will find a credit application in our catalog on page **81** for your use. Please fill in the application completely and sign. Allow our credit department (3) days maximum in which to establish open account status.

**Terms** Prices are F.O.B. our warehouse and will be billed at the time of delivery. Net 30 days for open accounts. Please establish credit in advance. New and used truck tanks: 10% deposit with order depending on specialty of equipment – balance upon completion.

**Freight** Orders are shipped freight collect unless otherwise established.

**Taxes** State sales taxes or any other taxes imposed by law will be added in accordance with such regulations. We are required to collect sales tax on goods bound to South Carolina, North Carolina, and Florida.

**Minimum Order** A \$3.00 service charge will be applied to orders less than \$25.00.

**Return Policy** A 15% restocking charge will be assessed on all returned items unless Oilmen's made a shipment error. For proper credit, Oilmen's must be notified that merchandise is being returned. Any item returned to us must be shipped prepaid. All items must be in good, resalable condition and returned within 60 days. No credit returns after 90 days.

### Damages or shortages in shipments en route

Our responsibility does not extend beyond our warehouse. Examine all shipments carefully before the delivering carrier leaves your premises. Where damage or shortage has occurred be sure to have freight bill signed by the driver (motor freight shipments). Damages occurring on UPS shipments are to be taken up with the driver making the delivery. Parcel post damages are to be reported to us immediately. Concealed damage claims must be made within forty-eight hours. In all instances we will attempt to assist you in securing adjustments provided you follow the above recommendations.

### Shipping Information

We make every effort to ship your order the same day we receive it. **When size and weight allow we use UPS, because it is normally faster.** On shipments 150 lbs. or above, we ship via motor freight pre-pay and add. Charges vary depending upon distance from Spartanburg, South Carolina.

### Regular handling charges:

Orders from \$ 25.01 to \$ 50.00 .... **\$ 8.00**

Orders above \$ 50.00 ..... **\$10.00**

**A \$10.00 service charge is assessed on packages taken to the bus station or shipped Air Express.**
